Hello,

I am writing to express my interest in the Architectural Intern position at Gensler in Beijing. As a third-year student in the NAAB-accredited Bachelor of Architecture program at Woodbury University in Burbank, I am eager to bring my academic foundation, practical experience, and passion for design to your team.

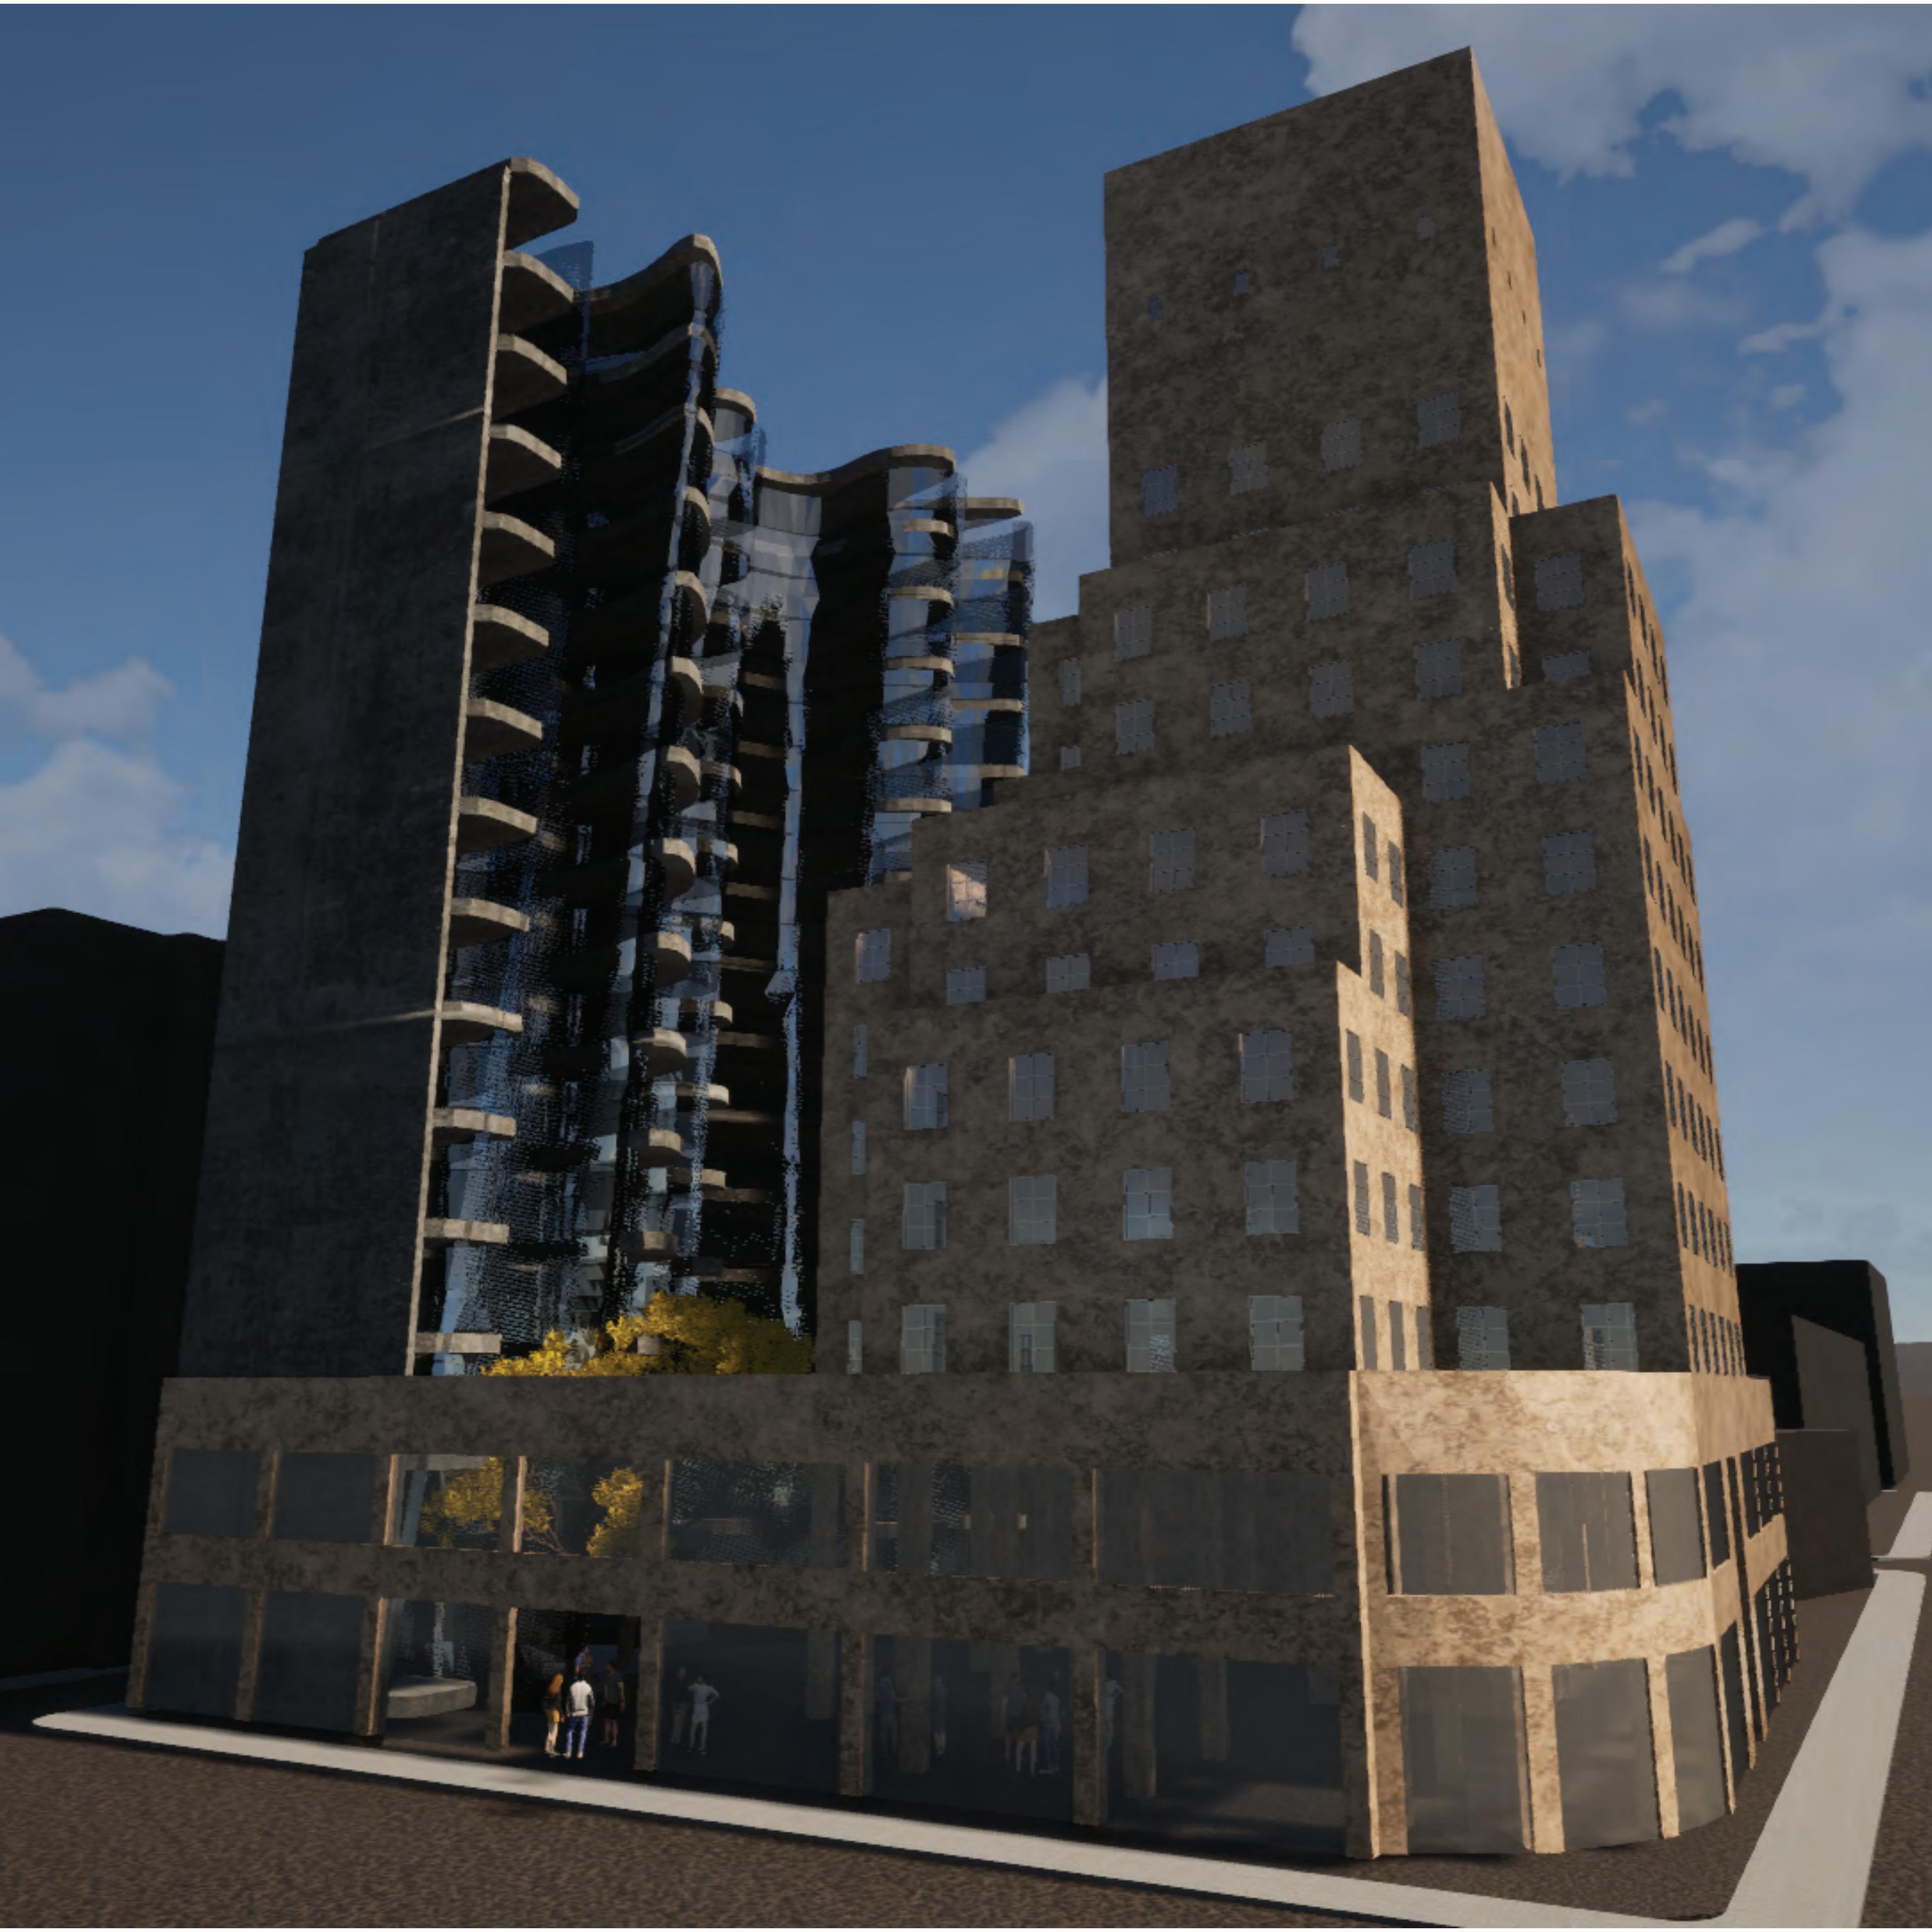

In addition to my major in Architecture, I am pursuing a minor in Computer Science Design Computation (CSDC), which has deepened my understanding of emerging digital tools and their application in architectural design. I am also planning to join Woodbury's IPAL (Integrated Path to Architectural Licensure) program next spring and have already begun logging AXP hours toward licensure.

Beyond the classroom, I've gained hands-on experience working with both a demolition contractor and a general contractor in Los Angeles. These roles have helped me develop a grounded understanding of construction processes, project coordination, and the practical aspects of building—insights that inform my design work and reinforce my commitment to creating thoughtful, buildable architecture.

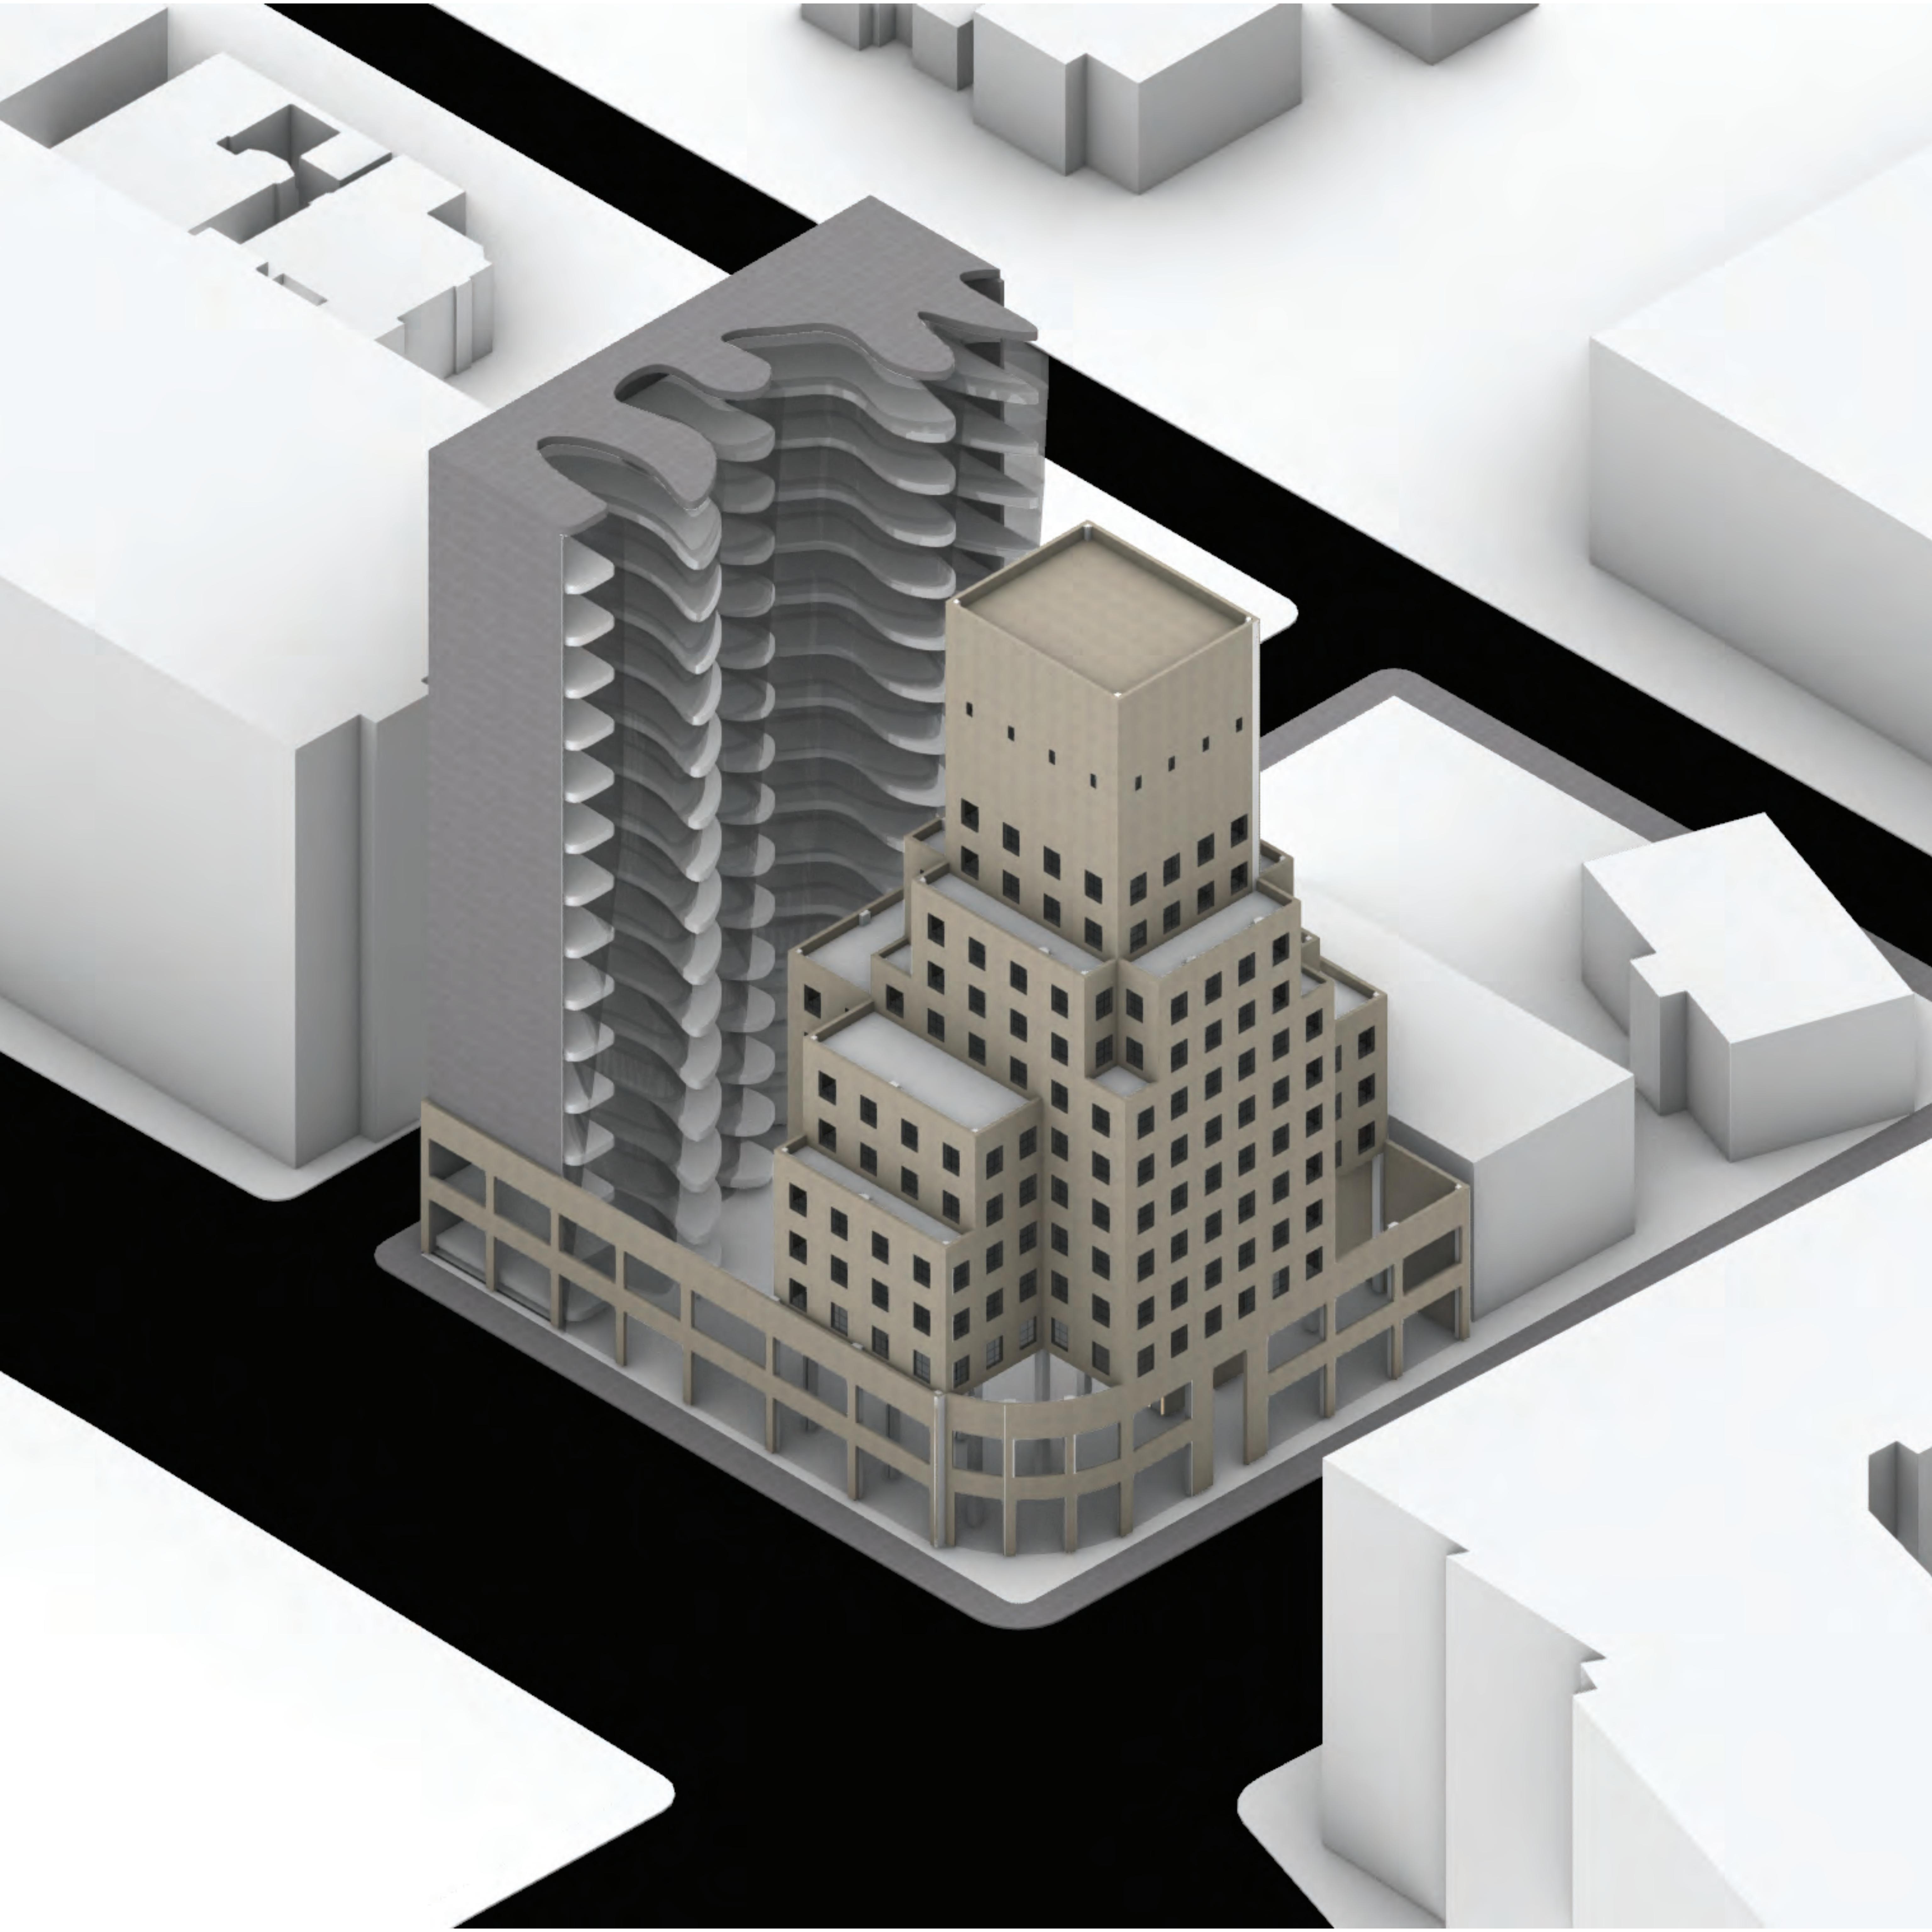

I am excited about the opportunity to contribute to Gensler and further develop my skills in a collaborative and professional environment. Thank you for considering my application. I would welcome the opportunity to discuss how I can support your team's goals and growth.

Sincerely,

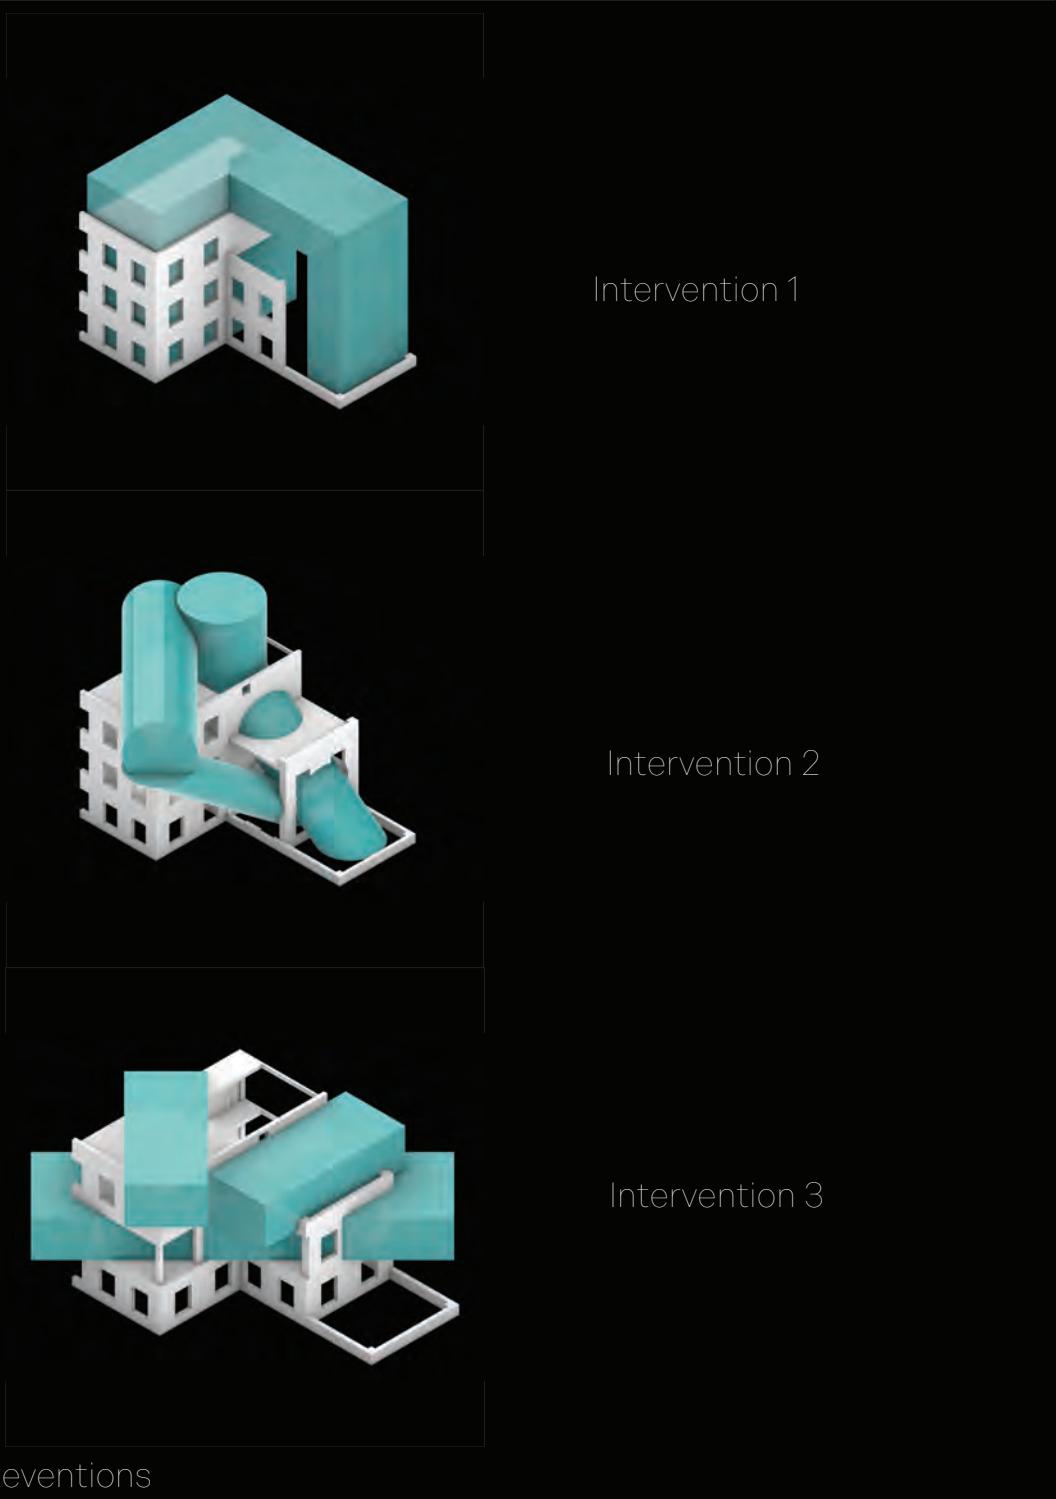

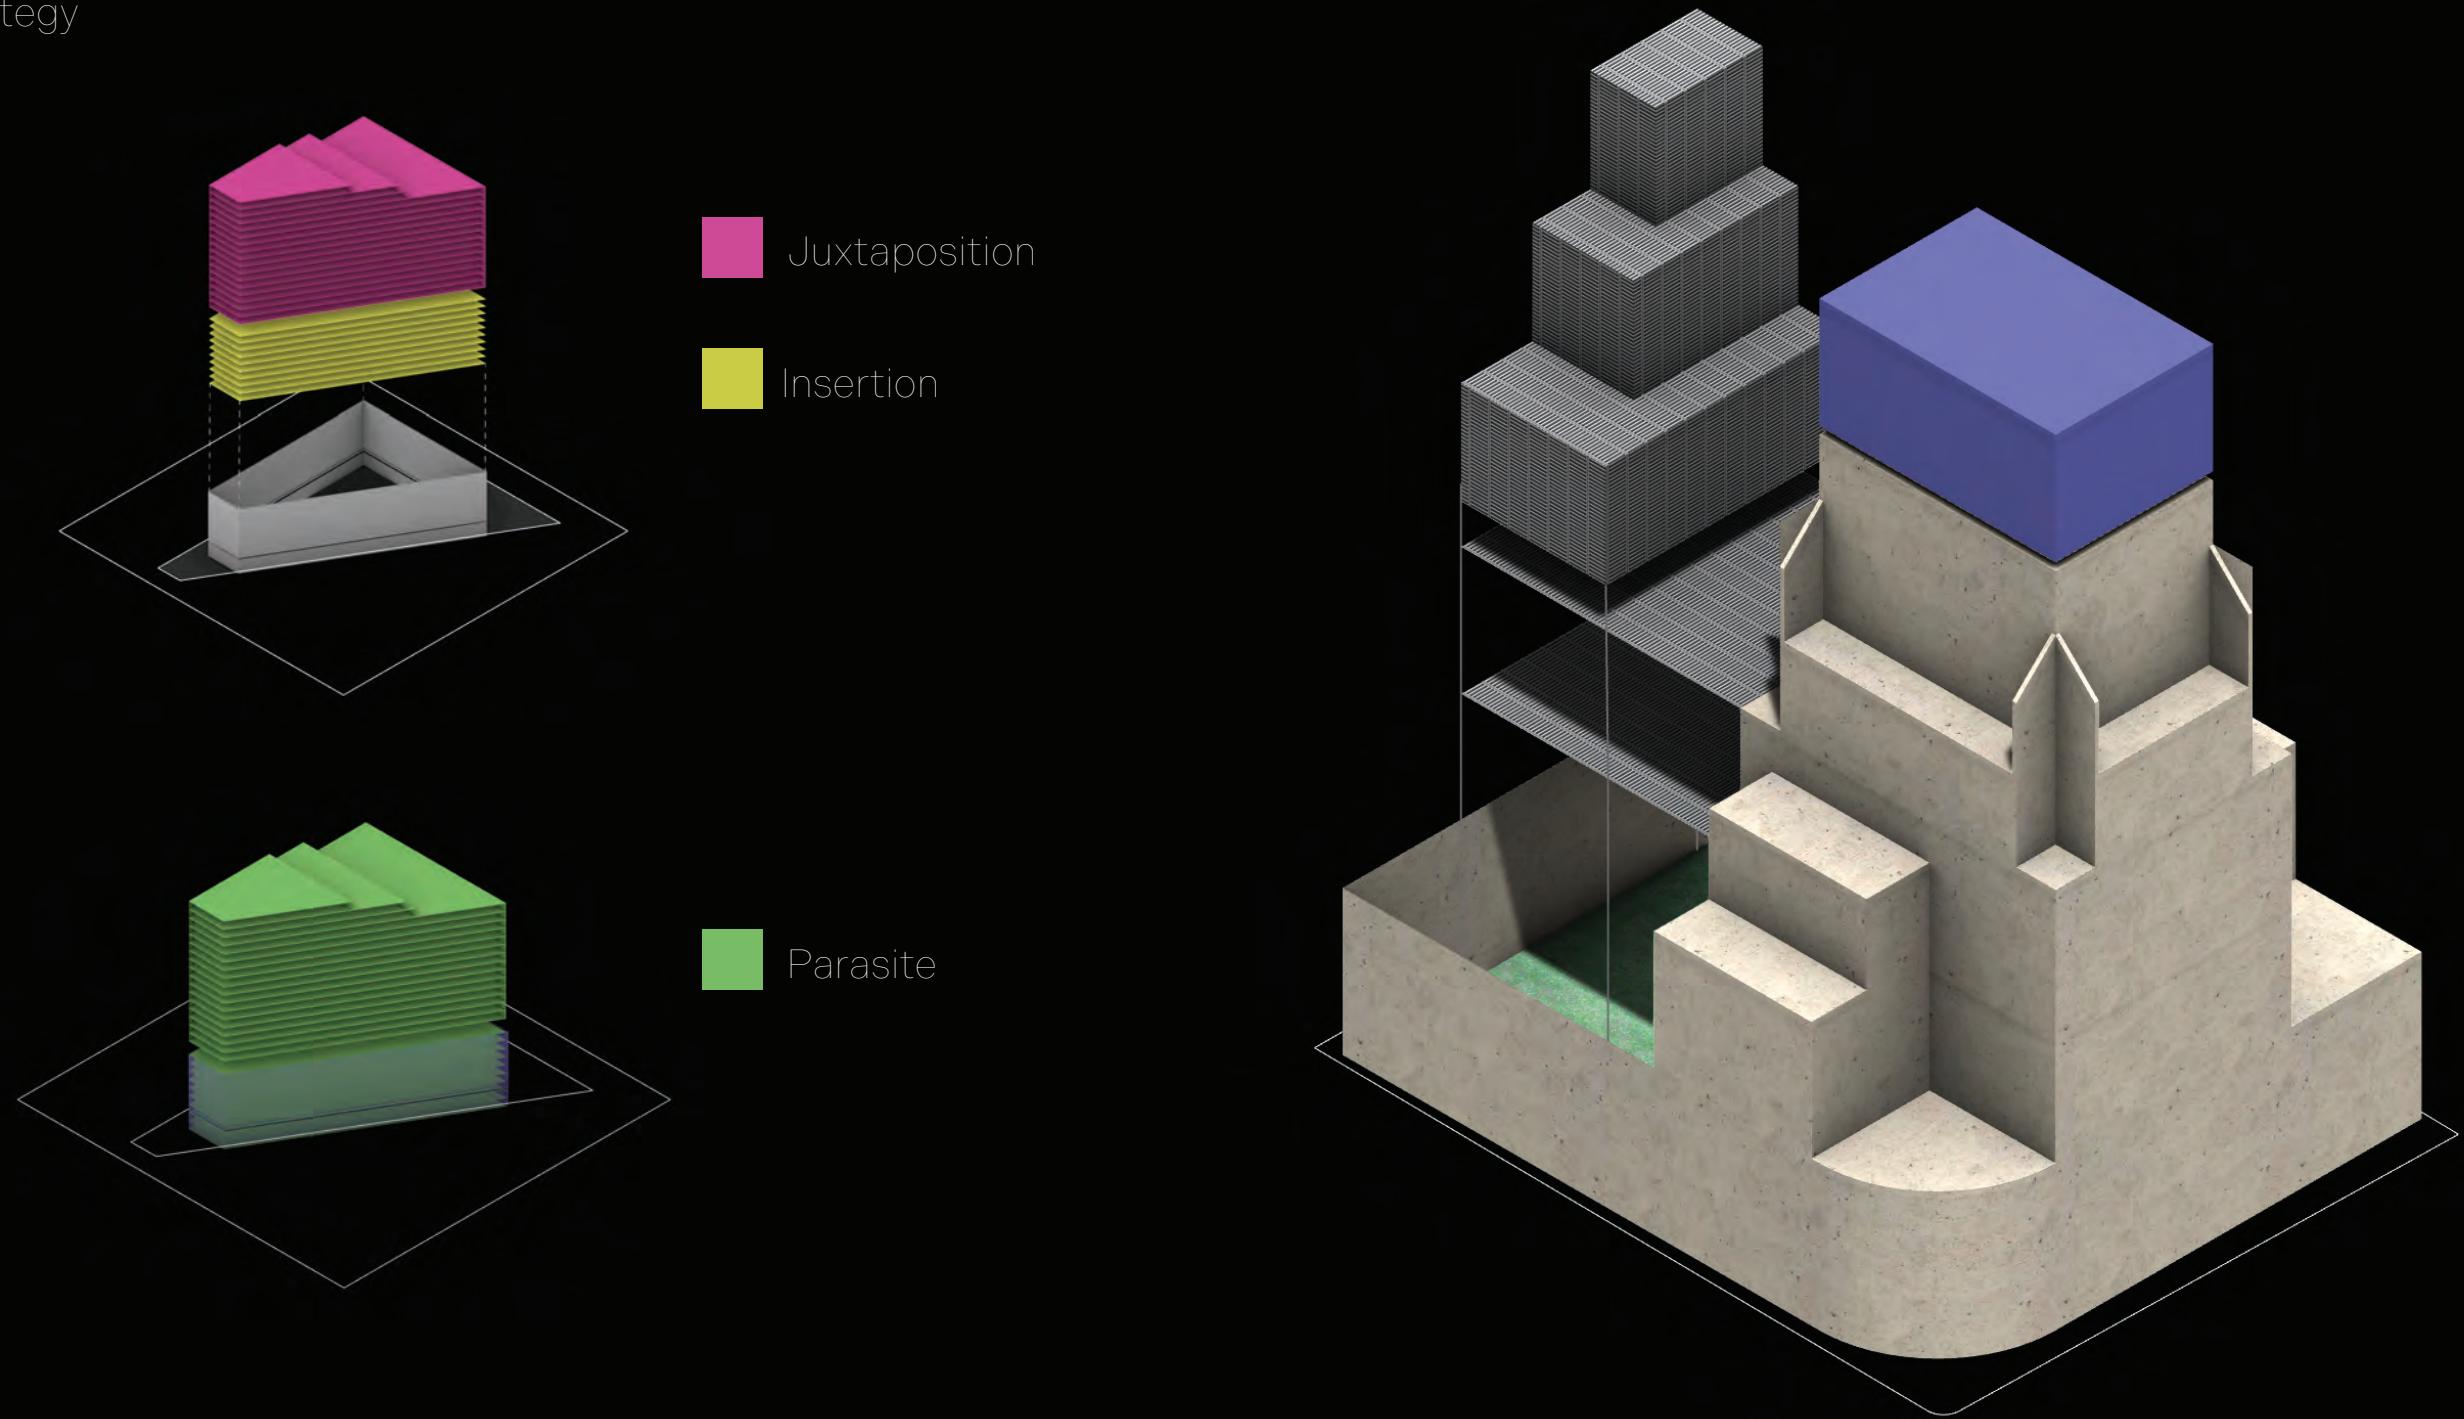

Oscar-Lucas Medrano
